

Function in C++

1. Find the cube of a number using Function.
2. Reverse a number n using Function, Constraints: $-5000 \leq n \leq 5000$
3. There are three numbers a,b,c. Put the value of a into b, put value of b into c and put value of c into a. Do it using Function.
4. Swap 2 numbers a, b without using extra variables. Range of $-10000 \leq a, b \leq 100000$.
5. Print “Hello Coder Army” n times using Function.
6. Given two numbers n, r. Find nCr (Combination). Use Function here.
7. Given a positive integer n. Your task is to return the count of set bits.
8. You are given two numbers a and b. The task is to count the number of bits needed to be flipped to convert a to b.
